

IN THE SPECIFICATION:

Please amend the specification as indicated below.

At page 8, the paragraph of lines 5-15, please amend to read:

A Referring to **Figure 3**, a pictorial diagram illustrating a library system with a walk-in service space is depicted in accordance with the present invention. Library **300** comprises several storage cell modules arranged in banks, which are place along the walls of an enclosure. Library **300** contains a single service door **301**, which enables a service technician to enter a walk-in work space **302**. Within this work space, the operator may access and service any of the components in the library, e.g., robots, guide rails, storage cells, and media drives. Additionally, some preferred embodiments of innovative library 300 include mechanical stops 304, described below.
